Nadia Okoye

nadia.okoye@example.test | +234 803 555 0198 | Lagos, Nigeria

Education

University of Lagos — 2017 – 2021-07-30
BSc, Physics — *Nigeria*

University of Lagos — 2022 – 2024-06-28
MSc, Computational Physics — *Nigeria*

Research Experience

Surrogate models for turbulent flow — 2022 – 2025
University of Lagos

- Surrogate models for turbulent flow
- Python
- Julia
- PyTorch
- Verified research experience

Uncertainty-aware numerical simulation — 2022 – 2025
Delta Systems Lab

- Uncertainty-aware numerical simulation
- Python
- Julia
- PyTorch
- Verified research experience

Climate downscaling benchmark — 2022 – 2025
Delta Systems Lab

- Climate downscaling benchmark
- Python
- Julia
- PyTorch
- Verified research experience

Work Experience

Delta Systems Lab — 2022 – 2025
Research Engineer

- Research Engineer, Delta Systems Lab (2022–2025)

Research Projects

Research direction: scientific machine learning and reliable simulation $—$ Python, Julia, PyTorch, HPC, nume

- Investigating scientific machine learning and reliable simulation using reproducible computational experiments.
- Applicant-reviewed research direction

Projects

Open-source finite-volume solver $—$ Python, Julia, PyTorch, HPC — 2024

- Open-source finite-volume solver aligned with reproducible scientific machine learning and high-performance simulation.

Climate downscaling benchmark $—$ Python, Julia, PyTorch, HPC — 2024

- Climate downscaling benchmark aligned with reproducible scientific machine learning and high-performance simulation.

Awards

Faculty prize for computational research, 2024, University of Lagos (): Faculty prize for computational research, 2024

Technical Skills

Python, Julia, PyTorch, HPC, numerical methods, LaTeX

Research Skills

scientific machine learning, uncertainty quantification, climate and physical systems; scientific machine learning and reliable simulation

Languages

English

Leadership

Coordinated the university open research reading group

Presentations

Internal research presentation on uncertainty-aware simulation
