

AMARA OKAFOR

amara.okafor@example.test | Lagos, Nigeria

EDUCATION

University of Lagos <i>B.Sc., Computer Science</i>	2020 – 2024 <i>Nigeria</i>
--	-------------------------------

RESEARCH EXPERIENCE

Single-cell transcriptomics research assistant <i>Lagos Computational Biology Lab (synthetic)</i>	2024
- Analysed single-cell RNA sequencing data and built reproducible feature tables for cell-state comparisons. - Python - Scanpy - quality control - feature engineering - Documented a reproducible analysis workflow for a synthetic pilot dataset.	

RESEARCH PROJECTS

Spatial cell communication models graph learning	2025-2026
- Proposed a study using graph representation learning, single-cell RNA sequencing, and spatial analysis to combine neighbourhoods with interpretable cell-cell communication signals. - Synthetic proposal grounded in confirmed research interests; no results are claimed.	

TECHNICAL SKILLS

Python
SQL
Git

RESEARCH SKILLS

Single-cell RNA sequencing analysis
Graph representation learning
Reproducible computational workflows

RELEVANT COURSEWORK

Algorithms
Machine Learning
Database Systems

PROJECTS

Cell-state analysis toolkit Python, Scanpy	2024
Built a small Python and Scanpy workflow for quality control, dimensionality reduction, and annotated cell-state comparisons.	

LANGUAGES

English
